If something does not work

Problem	Solution
Nothing opens after OK	DLL imports not allowed (step 3 / 4), or the DLL is not in **MQL5\Libraries**. Check the **Experts** tab at the bottom of MT5. *DLL allow nahi hui ya DLL ghalat folder mein hai.*
"Your QFTSimUI.dll is an older version"	Close MT5 completely, copy the new DLL again (Replace), start MT5. *MT5 band kar ke nayi DLL replace karein.*
The DLL disappears after copying	Your antivirus removed it. Restore it and add the MQL5 folder to the antivirus exceptions. *Antivirus ne DLL hata di – wapas laa kar exception mein daalein.*
The simulator is not in the Navigator	The .ex5 is not in MQL5\Experts of **this** MT5 (File → Open Data Folder shows the right one). Then Refresh. *File sahi MT5 ke Experts folder mein nahi.*

Updates

New versions come automatically: Main Menu → **Updates** → **Update now**, then restart MT5. Your license, data and saved simulations stay.

Naye version Main Menu → Updates se khud aate hain.
