QFT Replay Simulator

Market replay & manual backtesting for MT5 and MT4
Complete feature list – version 3.05

© Qazi Forex Tips | qaziforextips.com/simulator | WhatsApp +92-323-6700010

Practise on real historical prices as if the market were live: choose a symbol and a date in the past, the simulator hides everything after that moment and plays the market forward – candle by candle, at your speed or in real time. Trade, manage, rewind with Prev Bar, and measure your results with a professional report. **No real money at risk.**

Replay engine

- Tick data or M1 candles (realistic ticks are built from M1)
- All timeframes at the same time (MT5: 21 timeframes) plus **Renko** and **Range** bars
- Next Bar / Prev Bar, Bar Start or Bar End, Play with speed slider, **Real-time** mode
- Go to any date; rewind as often as you like
- **Up to 4 symbols together** – main + 3 extra pairs on the same second (DXY, correlation, SMT) 3.05

Trading

- Market and pending orders (Buy/Sell Stop & Limit), SL / TP in pips or price
- Lot by fixed size, **risk %** or **risk USD**
- **Visual Mode** – place and move entry, SL, TP with lines on the chart
- Auto Break-Even, Trailing Stop, OCO, partial close, comments
- Commission, spread, leverage and starting balance of your choice
- Trade every replayed symbol from one panel 3.05

Prop Firm Challenge

- 2-Step Phase 1 / Phase 2, 1-Step, Instant funding or **Custom** rules
- Profit target, daily loss and max loss checked on every tick
- Start / stop the challenge at any moment of the replay
- Live dashboard on every replay chart (target, today's loss, max drawdown)

Fast control

- **Smart Panel** – slim bar with Prev / Play / Next, speed, lot, Buy, Sell, Close All, P/L, time
- **Keyboard shortcuts**: Space play/pause, N / P bars, B / S buy/sell, + / − speed, Enter / Esc
- The host chart gets out of the way while you replay

Analysis tools

- Trading sessions as chart background, ICT killzones, Asian range, previous-day levels
- **Economic news** inside the replay, news lines, auto-pause before high-impact news
- Your **drawings copied** to all replay charts (Auto-Sync)
- **Indicators** added once appear on all replay charts
- Chart templates (and the QFT template)

Results & report

- Trades window: open, pending, history, closed, statistics, balance graph
- Every trade measured in **R-multiples**; expectancy, streaks, timing
- Professional **HTML / CSV report** with Monte Carlo test and a money management plan
- **Result per symbol** table for multi-symbol replays 3.05

Data Center

- Download tick or M1 history from your own broker – no extra data subscription
- Clear progress and reasons when the broker has no data
- CSV import of your own data
- **Download missing data** for extra pairs with one click 3.05

Save, share & update

- Save / Load / Auto-save; **Save as** to any folder with your own name
- Open a simulation from any folder – share practice sessions with students
- One-click **Software Update** (EA + DLL) and online license
- 4 themes, window size setting, MT5 **and** MT4 versions

★ Why traders use the QFT Replay Simulator

Built by traders, for practice that feels like the live market

You want to …	The simulator gives you …
Test a strategy quickly	Months of price action in hours: Play, speed slider, Next Bar, keyboard shortcuts and the Smart Panel.
Practise like the live market	Real broker data, real spread and commission, real-time mode, news releases inside the replay.
Pass a prop firm challenge	The exact rules (target, daily loss, max loss) checked on every tick – practise before you pay.
Read the market top-down	All timeframes at once, indicators and drawings on every chart, sessions and killzones.
Use correlation / SMT	Up to 4 symbols on the same second – for example Gold with DXY, EURUSD with GBPUSD.
Know your real edge	R-multiples, expectancy, Monte Carlo and a money management plan from your own trades.
Teach or learn in a group	Save a replay at an interesting moment and share the file – everybody starts from the same candle.

Requirements

Item	Requirement
Platform	MetaTrader 5 (64-bit) or MetaTrader 4 – Windows, any broker, demo or live login
Files	The simulator (.ex5 / .ex4) and QFTSimUI.dll; tick **Allow DLL imports**
Internet	Only to download history, the news calendar, license and updates – the replay itself works offline
Disk space	M1 data about 20 MB per year per symbol; tick data about 1 GB per year for Gold
License	1 license = 1 trading account number. Demo: 5 trades and the last month of data

Get the simulator / renew your license

Visit **qaziforextips.com/simulator** or send your account number on WhatsApp **+92-323-6700010**.
Installation and first steps: see the Install Guide PDF.
