POI SCORECARD (10 POINTS)

Score every POI before you trade it. Compare up to three zones (A, B, C) at once. Write the points in the box when the condition is met.

Date: Pair: Timeframe: HTF bias:

PTS	QUESTION	LESSON	ZONE A	ZONE B	ZONE C
2	Is the POI in the direction of the higher timeframe (H4, H1) bias?	Phase 1	☐	☐	☐
1	Is a bullish POI in discount (or a bearish one in premium)?	3.6	☐	☐	☐
1	Is the POI, or part of it, in the OTE (62% to 79%)?	3.6	☐	☐	☐
2	Was liquidity (IDM or a swing) swept before the POI?	1.6, Phase 2	☐	☐	☐
1	Did the move from the POI make a BOS or MSS?	Phase 1	☐	☐	☐
1	Did the displacement leave an FVG, or are an OB and FVG together?	3.1, 3.2	☐	☐	☐
1	Is the zone unmitigated (first touch)?	3.1	☐	☐	☐
1	Is there a clear draw on liquidity ahead with at least 1:2 RR?	2.5	☐	☐	☐
10	**Total (out of 10)**		☐	☐	☐

8 – 10
A+ POI: trade with full risk

6 – 7
B: half risk, or only with strong confirmation

0 – 5
Skip it: no trade

FOUR RULES FOR THE SCORECARD

1. Do not inflate the score. If a condition is missing, it is missing.
2. If an IDM near the upper zone is still unswept, that zone is often a trap; the deeper zone is better.
3. Even an A+ POI can fail: a lower timeframe CHoCH, a stop loss and a correct lot size are always needed.
4. Write every trade's score in your journal; after a month compare the results of A+ and B trades.
